EDUCATION

Rutgers University, Rutgers Business School New Brunswick, NJ
Bachelor of Science in Finance · Dean's List, 2019–2023 · 3.81 GPA

May 2023

SUMMARY

Three years delivering into regulated financial services, including platform rollout and adoption for Morgan Stanley's Home Loans division. Translates AI capability into workflows business units actually adopt, and writes the training material that carries them. Ships agentic systems daily, Midnight Jot and Fablewick as examples, on a foundation managing millions in annual deal volume and hundreds of Salesforce opportunities across clients.

FRONTIER FLUENCY

- Building a personal operations system that runs 100+ scripts, 50+ skills/commands, 30+ agents, and 10+ pre-action gates. The system recursively improves through iterations and ships code, autonomously reconciles trades, runs web automation.
- Authoring 30+ published learning guides, structured explainers with glossaries, quick-reference sections and diagrams, built on a repeatable document pipeline rather than one-off decks.
- Shipping AI workflows end-to-end: self-rendered charts, graded assessments, programmatic document pipelines (ReportLab + matplotlib, Playwright HTML to PDF), on routine schedules.
- Engineering pre-action gates that catch classes of automation error before execution (cost and blast radius, irreversible deletion, identifier verification, negative-result verification). An operational risk control layer applied to AI output.
- **Midnight Jot** (midnightjot.com): a one-stop jotting app hosted on Supabase and GitHub Pages, paragraph level data mapping with time, area, and personalized analyses, local-first with JSON import and export, so the user retains their data.
- **Fablewick** (mannp09.github.io/fablewick): an open-source AI storybook library with 11 publications, each with three toggleable reading levels in English, Hindi, Gujarati, Spanish, and French.

EXPERIENCE

Accenture LLP Morristown, NJ
Consultant

May 2023 – Feb 2026

- Drove platform release and adoption for Morgan Stanley's Home Loans division: wrote the user stories, ran the sprint cadence, built the rollout and training material, and reported business-unit value so invested leadership had delta visibility.
- Delivered as subject matter expert and liaison between clients, business users, and cross-functional teams, translating technical delivery into terms non-technical stakeholders could act on.
- Owned the deal workflow for a book of financial institutions, and managed hundreds of Salesforce CRM opportunities covering millions in annual deal volume for client and delivery.
- Redesigned how work entered and moved through the delivery queue across concurrent engagements, cutting backlog significantly in six months and raising sprint velocity.

Corient Morristown, NJ
Wealth Management Intern

Mar 2022 – Jul 2022

- Supported high-net-worth clients and their advisors across retirement, tax, investment, and estate strategies, while conducting due diligence on hundreds of investment funds to evaluate prospectus alignment, benchmark performance, and risk parameters.
- Delivered a capstone advisory engagement applying financial planning principles to increase portfolio efficiency and generate projected tax savings.

SKILLS

- **AI and agents:** Claude Code, Codex, Cursor, agentic system design, multi-agent orchestration, MCP connectors (Gmail, Drive, Calendar), scheduled and event-driven agents, prompt engineering, pre-action guardrails, n8n
- **Languages and data:** Python, SQL, JSON, CSV pipelines
- **Build and ship:** Playwright, HTML to PDF pipelines, Git and GitHub, GitHub Pages, Supabase, Cloudflare DNS
- **Enterprise platforms:** Salesforce, Jira, Workday ERP
- **Practice:** AI strategy and workflow orchestration, adoption and enablement, training material and documentation, requirements and user stories, sprint cadence, audit and discovery, stakeholder management, due diligence
